

#16

CATALOGO GENERALE

*Alco Ceramiche crea il perfetto equilibrio tra nuove avanguardie stilistiche e la solidità tecnica data da un'esperienza trentennale. Le sue collezioni di pavimenti, rivestimenti e decorazioni sono un punto fermo dell'alta tecnologia ceramica, pur regalando sempre atmosfere di nuovo stile alla casa contemporanea.*

*Alco Ceramiche creates the perfect balance between new stylish forefronts and technical solidity brought by 30 years of experience. Its floors and walls collections and decorations are milestones in ceramic technologies, but they also provide new style to the contemporary house.*

# PULIZIA E MANUTENZIONE

## CLEANING AND MAINTENANCE

### PULIZIA E MANUTENZIONE DI DECORI E INSERTI:

Per la pulizia, evitare nel modo più assoluto sostanze abrasive. Usare solo acqua e sapone neutro. Le decorazioni mediante l'applicazione artigianale di vetri e graniglie vetrose sulle piastrelle ceramiche possono presentare delle irregolarità nella distribuzione di dette graniglie. Questo non pregiudica l'effetto estetico del prodotto, ma anzi ne esalta le caratteristiche.

Altra particolarità di questa applicazione è l'effetto craquelè. Si precisa che le irregolarità di disegno e di stesura del colore e la diversità tra piastrella e piastrella nei decorati a mano, non sono da considerarsi difetti, ma anzi contraddistinguono il prodotto eseguito completamente con tecniche manuali.

### PULIZIA E MANUTENZIONE DI DECORI E INSERI CON ORO E LUSTRI:

A posa effettuata, per ritirare tutti i residui del materiale usato, la pulizia deve essere essere eseguita solo con spugna o panno morbido abbondantemente imbevuto in acqua; mai detersivi o paste abrasive. In successive pulizie, non usare detersivi in polvere, soluzioni acide o alcaline né spugne abrasive. E' sufficiente un panno morbido imbevuto in sapone liquido neutro, o acqua calda e alcool. Si possono usare anche prodotti specifici per la pulizia di oro, rame e lustri. I decori realizzati con smalti contenenti percentuali di oro platino puro con il tempo possono perdere la loro brillantezza assumendo una colorazione tipica dell'oro antico. L'applicazione di pregiati lustri metallizzati dona alla piastrella diversi toni di colore dando al prodotto accentuati riflessi madreperlati ed una maggiore incisività nei colori. In caso di ossidazione dell'argento, sfregare delicatamente con un panno per riottenere la lucentezza originaria. Non accetteremo contestazioni qualora non fossero state osservate le suddette avvertenze.

### PULIZIA E MANUTENZIONE CON CRISTALLI:

Per la pulizia è assolutamente vietato fare uso di detergenti abrasivi, che potrebbero segnare la superficie dei cristalli, come anche di solventi (quali benzina, acetone, detergenti a base acida,...), i quali potrebbero intaccare non solo la superficie dei cristalli stessi, ma anche i collanti impiegati per il loro incollaggio.

Si consiglia pertanto il solo impiego di detergenti neutri.

### CLEANING AND MAINTENANCE FOR DECORATIVE TILES:

While cleaning decorative tiles, never use abrasive cleaners. Only use water and neutral detergents. In decorative tiles with hand-applied pieces of glass and glass chips, the distribuiton of the application will often be uneven, given their hand-crafted nature. This, however, is by no means a defect but rather a natural highlighting of the of the intrinsic beauty of the effec. In fact, another natural effect of this application method is the "craquelè" (crazed) surface. Please note that regarding hand-decorated tiles, any unevenness in the pattern of the colouring and any difference between one tile and another, should not be regarded as defects. Far from it! Those are essential features of hand-crafted material and thus the hallmark of a genuine product.

### CLEANING AND MAINTENANCE FOR PRECIOUS METAL FINISH:

Special care must be taken when fixing to ensure that any adhesive is wiped from the surface of the tile before it hardens. This should be done using a damp sponge and plenty of clean water. On no account should wall tile grouts containing abrasive, or coarse filler be used. After grouting the tiles, they should be cleaned only with a damp soft sponge and clean warm water, neutral detergent or alcool. Specific products for gold, copper and metal finish cleaning can be used as well. N.B. Abrasive agents, acids, alkalis and detergents should not be used. Decorative tiles whose glaze contains a percentage of pure gold platinum, can in time lose some of their iridescent effect, and the colour takes on the appearance of fine old gold. The application of fine metals in the glaze creates a kaleidoscope of colours like a delicate mother of pearl while highlighting the characteristics of the individual colours as lighting and conditions change. In case of silver oxidation, rub gently with a soft cloth to get the original brightness back. The Ceramic declines any and all liability for damage or defects caused by failure to observe these instructions.

### CLEANING AND MAINTENANCE FOR CRYSTALS:

Do not use abrasive detergents for cleaning, as these could mark the crystal surface, and equally do not use solvents (petrol, acetone, acid-based detergents,...), which could damage not only the surface of the crystals but also the glues used to hold them in place. It is recommended to use only neutral detergents.

The colour variation of the Crystals is a specific and inherent feature of this product.

### CONSIGLI PER LA PULIZIA E MANUTENZIONE DI PAVIMENTI E RIVESTIMENTI (ESCLUSI PRODOTTI IN TERZO FUOCO)

#### PULIZIA DI BASE:

deterdek (resa: 40 m2/diluizione 1:5): il detergente acido per tutte le superfici ceramiche che pulisce perfettamente dai residui di posa senza rovinare la natura del materiale. Spazzare accuratamente il pavimento e lavare con soluzione di deterdek diluito in rapporto 1:5. Lasciare agire alcuni minuti e successivamente intervenire con monospazzola munita di disco verde e aspiraliquidi. In mancanza di una monospazzola aiutarsi con uno spazzolone in saggina, eliminando l'acqua accuratamente con l'aiuto di uno straccio. Molto importante è il risciacquo con acqua pulita.

#### MANUTENZIONE:

filacleaner (resa: 2000 m2/ senza risciacquo): il detergente neutro semplice da usare, efficace e senza risciacquo. Diluire filacleaner secondo il grado di sporizia. Molto diluito (a partire da 1:200 = 25ml su 5 litri d'acqua) non occorre risciacquo. In caso di diluizione superiore a 1:200, filacleaner può essere utilizzato anche con l'ausilio di una macchina lavapavimenti.

#### MANUTENZIONE STRAORDINARIA:

fila PS/87 detergente, decerante, sgrassante

in caso di sporco tenace = diluire 1:10

per rimuovere macchie e residui di stucco epossico = usare puro

diluire fila PS/87, applicare sulla superficie e risciacquare

#### TRATTAMENTO PROTETTIVO PER GRES PORCELLANATO E LAPPATO:

fila MP/90 (resa: 40m2/non diluito): protettivo antimacchia per gres porcellanato e pietra naturale. Applicare fila MP/91 con pennello, rullo o straccio sul pavimento o rivestimento asciutto (ossia almeno 4 ore dopo il lavaggio). Quando il prodotto si è perfettamente asciugato (dopo almeno 12 ore), eliminare il residuo con monospazzola munita di disco beige. Eventuali residui possono essere rimossi con uno straccio o con una lucidatrice.

N.B. i residui di fila MP/90 possono essere eliminati facilmente e rapidamente utilizzando lo stesso prodotto fila MP/90: utilizzare uno straccio intriso di fila MP/90, passandolo sulla parte interessata.

### CLEANING AND MAINTENANCE FOR FLOOR AND WALL TILES (EXCEPT OVERGLAZED DECORS)

#### BASIC CLEANING:

deterdek (coverage: 40m2/diluition 1:5): the acid cleaner for all ceramic surfaces, which cleans effectively without damaging the material. Sweep the floor thoroughly and clean with a solution of deterdek diluted 1:5.

Leave it to act for a few minutes, then clean with a single-disc professional cleaner fitted with green disc and vacuum drier. Having no single-disc cleaner, use a vegetable bristle cleaning brush and remove water carefully using a cleaning rag. It is very important to rinse with clean water.

#### MAINTENANCE:

filacleaner (coverage: 2000 m2/ no rinsing): the easy to use, effective, no rinse neutral cleaner. Dilute filacleaner depending on the amount of dirt. When using weak solutions (from 1:200 = 25ml in 5 litres of water) no rinsing is required. When diluted more than 1:200, filacleaner can be used also with a floor cleaning machine.

#### EXTRAORDINARY MAINTENANCE:

fila PS/87 cleaner, wax remover, degreasing

for stubborn dirt = dilute 1:10

to remove stains nad residues of epoxy filler = use pure

dilute fila PS/87, apply across the surface and rinse

#### PROTECTIVE TREATMENT FOR GLOSSY POLISHED AND LAPPATO TYPE PORCELAIN TILES:

fila MP/90 (coverage: 40m2/undiluted): stain protection for polished porcelain stoneware and natural stone.

Apply fila MP/90 with a brush, roller or sponge to a dry floow or wall (wait at least 4 hours after cleaning with water). When the product is perfectly dry (at least 12 hours after), remove residues using a single-disc professional cleaner fitted with beige disc. Any remaining residues can be removed using a rag or a floor polisher.

N.B. residues of fila MP/90 can be quickly and easily removed using fila MP/90 itself: wipe the spot with a rag dipped in fila MP/90.
