I solchi che delimitano le tessere sono appositamente incisi e non smaltati per consentire la massima aderenza dello stucco in fase di finitura. Una volta posato, il Mosaico non ha bisogno di cure particolari, per mantenere nel tempo la brillantezza della superficie è sufficiente passare un panno umido.

The grooves marking the edges of the squares are deliberately cut and not glazed to offer optimum grout adherence during the finishing process. Once laid, the Mosaic does not need any special care; to keep the surface looking shiny for longer, simply wipe regularly with a damp cloth.

Les sillons qui délimitent les tesselles sont expressément tracés et non émaillés pour permettre à la Pâte à joint de bien adhérer durant la phase de finition. La Mosaïque, une fois posée, ne nécessite d'aucun entretien particulier. Il suffit de passer un chiffon humide pour que la surface conserve longtemps toute sa brillante.

Die Rillen am Rand der Mosaiksteinchen wurden absichtlich eingraviert und nicht glasiert, um das maximale Haftvermögen des Stucks bei der Nachbearbeitung zu gewährleisten. Nach der Verlegung bedarf das Mosaik keiner besonderen Pflege. Um den ursprünglichen Glanz der Fläche auf lange Zeit zu bewahren, reicht ein feuchtes Tuch.
