A modern shower stall featuring large white square tiles with a fine, uniform perforation pattern. A chrome showerhead is mounted on a vertical pole. In the foreground, a dark grey shower tray holds a small black bowl with soaps and a folded red towel. A white bath mat is on the floor. The background wall is composed of dark grey tiles.

20x40 Shadow Mosaico Nero

20x40 Shadow Mosaico Marron

I solchi che delimitano le tessere sono appositamente incisi e non smaltati per consentire la massima aderenza dello stucco in fase di finitura. Una volta posato, il Mosaico non ha bisogno di cure particolari, per mantenere nel tempo la brillantezza della superficie è sufficiente passare un panno umido.

The grooves marking the edges of the squares are deliberately cut and not glazed to offer optimum grout adherence during the finishing process. Once laid, the Mosaic does not need any special care; to keep the surface looking shiny for longer, simply wipe regularly with a damp cloth.

Les sillons qui délimitent les tesselles sont expressément tracés et non émaillés pour permettre à la Pâte à joint de bien adhérer durant la phase de finition. La Mosaïque, une fois posée, ne nécessite d'aucun entretien particulier. Il suffit de passer un chiffon humide pour que la surface conserve longtemps toute sa brillante.

Die Rillen am Rand der Mosaiksteinchen wurden absichtlich eingraviert und nicht glasiert, um das maximale Haftvermögen des Stucks bei der Nachbearbeitung zu gewährleisten. Nach der Verlegung bedarf das Mosaik keiner besonderen Pflege. Um den ursprünglichen Glanz der Fläche auf lange Zeit zu bewahren, reicht ein feuchtes Tuch.

I seguenti inserti sono stati realizzati sublimando un'immagine digitale nella parte superiore di una formella di marmo botticino. Il supporto su cui viene applicata l'immagine è in marmo naturale non trattato con conseguenti pregi quali profondità, naturalezza, morbidezza, ed effetti quali assorbimento, attaccabilità alle macchie di una pietra naturale.

CARATTERISTICHE TECNICHE DEL PRODOTTO

I materiali decorati con la tecnica della sublimazione sono trattati con sostanze poliuretaniche, pertanto non compatibili con sostanze alcaline.
